Mon, 18 Feb 2019 01:19:00 GMT liquid chromatography of natural pigments pdf - High-performance liquid chromatography (HPLC; formerly referred to as high-pressure liquid chromatography) is a technique in analytical chemistry used to separate, identify, and quantify each component in a mixture. It relies on pumps to pass a pressurized liquid solvent containing the sample mixture through a column filled with a solid adsorbent material. Tue, 19 Feb 2019 02:37:00 GMT High-performance liquid chromatography - Wikipedia - Chromatography was first employed in Russia by the Italian-born scientist Mikhail Tsvet in 1900. He continued to work with chromatography in the first decade of the 20th century, primarily for the separation of plant pigments such as chlorophyll, carotenes, and xanthophylls. Since these components have different colors (green, orange, and yellow, respectively) they gave the technique its name. Mon, 18 Feb 2019 21:29:00 GMT Chromatography - Wikipedia - This chapter focuses on high performance liquid chromatography (HPLC), which is an instrumental analytical method that gained increased acceptance mainly because it met two basic factors: (1) the need for a wide range of rapid

analyses for nutrients, and (2) the need for methods that can be easily automated.
